

CLAINER VENTURA
FULL-STACK SOFTWARE DEVELOPER | APPLICATION, DATA & BUSINESS SYSTEMS
New York, NY | v.clainer11@gmail.com | www.clainerdev.com

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 6+ years of experience building responsive web applications, database-driven business platforms, and interactive digital products. Skilled across requirements, UI/UX, frontend and backend development, SQL/database workflows, REST API integration, testing, debugging, version control, containerized development, secure remote access (SSH key authentication, VPN), and system improvement. Combines software, data, business operations, and creative technology to build practical end-to-end solutions.

TECHNICAL SKILLS

Development: JavaScript • React • Node.js • HTML5 • CSS3 • DOM • Responsive Design • Component-Based Development

Backend & Data: REST APIs • MySQL • SQL • MySQL Workbench • Relational Databases • Queries • CRUD • Data Management

Tools & Systems: Git • GitHub • Git Bash • Docker • Linux • PowerShell • VS Code • Chrome DevTools

Networking & Security: SSH • SSH Key Authentication (Public/Private Keys) • SSH Authentication Settings • VPN Security • Kali Linux

Engineering: Requirements Analysis • Testing • Debugging • Troubleshooting • Implementation • Maintenance • Performance Optimization

Creative & Business: UI/UX Systems • Business Development • Business Tools • Video Editing • 3D Modeling • Game Development • English/Spanish

PROFESSIONAL EXPERIENCE

UNIVERSAL LIMITLESS LLC / UNIVERSALLIMITLESS.COM | Full-Stack Software Developer, Independent | 2020 – Present

- Design, develop, test, implement, and maintain full-stack web applications and database-driven business systems using JavaScript, React, Node.js, HTML5, CSS3, MySQL, and SQL.
- Build responsive frontend interfaces connected to backend services, REST APIs, application logic, and relational databases for complete end-to-end workflows.
- Translate business and user requirements into application components, UI/UX systems, database structures, queries, and operational workflows.
- Develop and manage data workflows supporting customers, transactions, inventory, orders, administration, and business operations.
- Troubleshoot application, database, and integration issues; use Git/GitHub for source control and Docker, Linux, PowerShell, and terminal workflows for development and deployment preparation.

SELECTED DEVELOPMENT PROJECT

LimitlessVisual.com | Full-Stack Business & Business Application

- Developed a database-driven platform for payments, orders, inventory, customers, analytics, and administrative tools, connected to a cloud database hosted on Railway.
- Integrated secure online payment processing and containerized the application with Docker (images and containers) for consistent development and deployment.
